

MICROMAN[®]

The Pipette of Choice for Problem Liquids!

Your benefits

ACCURACY & PRECISION

- Performing Gilson's solution for problem liquids
- Microman specifications are 3 to 4 times better than an air displacement pipette when pipetting viscous or volatile liquids

CONTAMINATION BARRIER

- No contact between liquid and pipette provides ultimate contamination protection for sample, pipette and user

TIME SAVING

- Pipette volatile and viscous liquids without having to saturate air cushion

Gilson Secured Pipetting System

ISO 8655-2 recommends the use of tips supplied by your pipette manufacturer for optimal results. Capillary Pistons (CP) tips guarantee that Microman meets our specified tolerances.

Complete your equipment with

1 μ L - 1000 μ L

Volatile
Viscous
Dense
