Laboratory Identification

Labels, printers & software for laboratories

About BRADY

Once you have worked with BRADY, our name will stick with you, (just like our labels) because BRADY is one of the world's leading labelling and identification specialists.

Innovative

At BRADY we continue to improve. We have many customers from all industries, and we strive to be ahead of their needs by continuing to invest in research for even more performant solutions. By developing more user-friendly and efficient concepts, we give our thousands of customers the best in the market.

Strength

At BRADY, we believe our biggest strength is the wide range of identification and safety solutions we can offer our customers, whether it's labelling the smallest component or complete signage for an entire warehouse. We're also proud to offer many products and services - from printers, scanners and software to service contracts and on-site training - that compliment any identification job. And don't forget, our wide network of expert distributors can always offer you a tailor-made solution to meet your specific requirements.

Trust

For almost a hundred years, BRADY has been connected with quality, trust and stability. We demand the best for your products and services, because we know, better than anyone, the importance of good and reliable identification. Identification looks like a small detail, but every professional knows that this kind of detail is crucial to any business.

Inform

We also have specialised dealers in your region, who can answer all your identification and labelling questions, specific to your activity. They will be happy to provide you with all kinds of options and solutions with no obligation.

BRC Listed NYSE THE NEW YORK STOCK EXCHANGE

Brady products are sold on the condition that the purchaser will test them in actual use and determine for himself/herself their suitability to his/her intended purpose Brady warrants to the purchaser that Brady products are free from defects in material and workmanship but limits its obligation under this warranty to the replacement of the product which has been shown to Brady's satisfaction to have been defective at the time of its purchase.

The warranty does not extend to any persons who have acquired the product from the purchaser. It is in lieu of any other warranty, including every warranty of sale-ability, marketability or suitability for the intended purpose, and is also in lieu of any other obligation or liability on the part of Brady.

Under no circumstances will Brady be liable for losses, damage, costs or subsequent damage of whatever nature which may arise in connection with the use of, or inability to use, Brady's products.

The Brady Advantage

When it comes to identification, safety and compliance, there's a clear advantage to working with Brady. We put our customers first in everything we do.

Our goal is to give you an unrivalled customer experience. We are relentlessly committed to performance and excellence - in our products, services and people.

Our products and solutions perform in ways that others simply can't match. Our people perform in ways that regularly exceed your expectations, and our focus and discipline work toward solid, long-term performance for our customers.

In short, Brady is the company you trust when performance matters most.

Learn more about the Brady Advantage at: www.bradyeurope.com

Simplify Your Laboratory Identification

Brady's laboratory identification products are designed to serve the world's biotechnology, agricultural, environmental and forensic researchers. Whether you work in pathology, histology, chromatography or other areas of science, Brady labelling solutions can help you maintain Good Laboratory Practice

Brady Sample Identification solutions:

- match existing vial, slide, and well plate sizes
- remain legible throughout processing and storage
- endure freezer storage, liquid nitrogen, autoclave, hot water baths and solvents including Xylene, DMSO and Ethanol
- allow bar coding for extensive information storage on even the tiniest sample
- integrate seemlessly with your Laboratory Information Management System (LIMS)

Hand-written versus printed labels

Did you ever had to postpone research because of unidentified samples, or because nobody was able to read anymore what was once written on the sample you need? Printed laboratory labels, engineered specifically to identify samples, help avoid sample loss and a lot of frustration.

Hand-Written Information

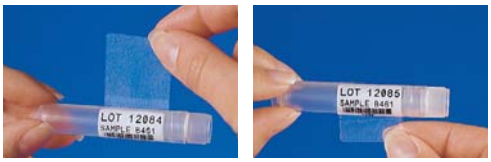
- Is difficult to read
- Smears when handled
- Has limited communication potential
- Fades over time when stored
- Is erased by chemicals

Brady Printed Laboratory Labels

- Are crisp, clear and readable
- Do not smear nor fade
- Can hold much information
- Have increased durability
- Resist chemicals

Lab-durable labels

Brady's special self-laminating or wrap around label protects your label's legend from extreme temperature, chemicals and solvents.



For best adhesion, we recommend that you do not touch the adhesive side of the label when wrapping it around your vial or tube.

- Printing is readable every time
- Clear portion wraps around and laminates the legend
- Provides window to view liquid level inside vial
- Low profile (extremely thin) label resists jamming in centrifuge or racks
- Labels withstand liquid nitrogen (-196°C), freezer (-80°C), autoclave (+121°C) and chemicals like Xylene

On-site Label Creation

Brady printers enable professionals to print highly specialised identification labels on-site and on demand. Partnered with customisable software and a specific application system for laboratories, adaptable to specific processes or data file formats, Brady printers support considerable time savings and flexibility in sample identification.
Every Brady identification label can be printed on-site using a Brady mobile, or benchtop printer. See page 38 for the full range of label printers.

Laboratory Identification Labels

Extensive material knowledge combined with chemical expertise enables Brady to develop durable labels that perform throughout sample storage and processing.

Temperature range goes to -196°C if material is wrapped around vial and overlaps itself
B-595	R6000; R4400; R6900	-40 °C	82 °C						✓	✓	✓					Available in White, Red, Yellow, Green, Blue, Orange, Black and Clear.
Vinyl Cloth																
B-498	R4300	-40 °C	80 °C	✓	✓		✓		✓	✓	✓					Removable from flat surfaces; write-on capabilities. Available in White.

Part number explanation

Most Brady references for printable labels follow the same three-part format: The first code indicates the technology, the second part is a number indicating the label size (where applicable) and the third part indicates the Brady material (where applicable).

M71-73-461

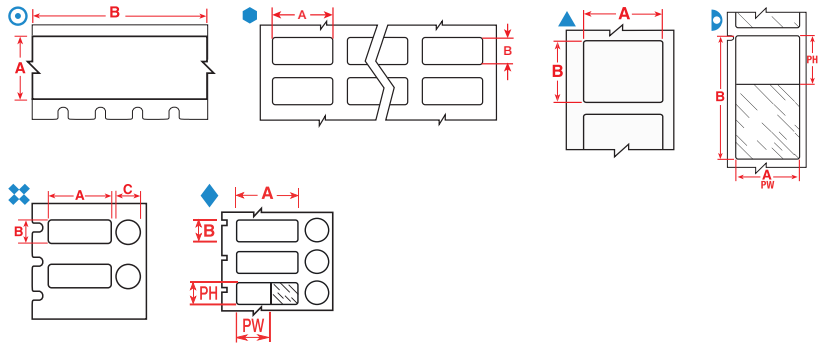
- M71 — BMP71 Technology
- 73 — Label size code
- 461 — Material (B-number)

Vial / Tube Labels

Brady's vial and test tube labels are designed to withstand extreme laboratory solvents like Xylene, Ethanol, Alcohol and DMSO, ensuring that the specimen identification is always legible - and will not smear, fade or fall off.

- **F** Freezer environment
- **N** Liquid nitrogen environment
- **A** Autoclave environment
- **H** Hot water bath (100°C)
- **S** Self-laminating label
- **L** Low-profile (extremely thin) label
- **R** Removable

Diagram



Labels are shown per vial / tube size and in order of label width.

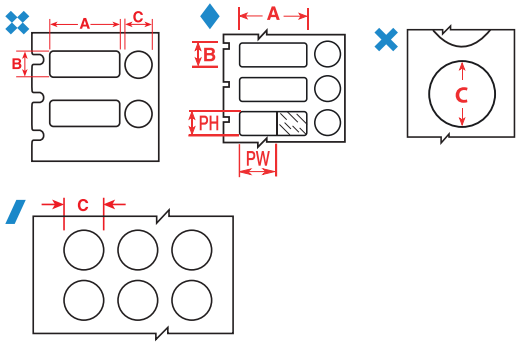
Vial Top Labels

Save time by using the Vial and Vial top combination labels - print your information in one go.

Diagram



- **F** Freezer environment
- **A** Autoclave environment
- **H** Hot water bath (100°C)
- **S** Self-laminating label
- **L** Low-profile (extremely thin) label
- **R** Removable

Labels are shown per vial / tube size and in order of label width.

The background colours in the Order Reference column represent the material colour

See page 38 for Brady's range of label printers.

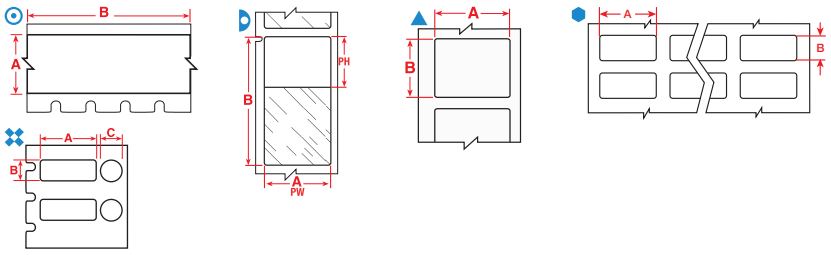
Centrifuge / Microcentrifuge Labels

Brady offers a wide range of Centrifuge, Eppendorf and PCR Labels.
When applying a self-laminating label, we recommend you avoid touching the adhesive side of the label when wrapping it around a vial or tube, to ensure maximum adhesion.

Diagram



Labels are shown per vial / tube size and in order of label width.

The background colours in the Order Reference column represent the material colour

See page 38 for Brady's range of label printers.

Cryo Tubes & Vials

Brady's offers a range of labels designed specifically to identify laboratory samples for cryo storage. These labels can be applied to room temperature or to already frozen samples, albeit with a small overlap. The label will remain legible and will stick to the sample container during processing, even when exposed to extreme heat or chemicals like DMSO, Xylene and Ethanol, ensuring secure sample identification in the most challenging laboratory conditions.

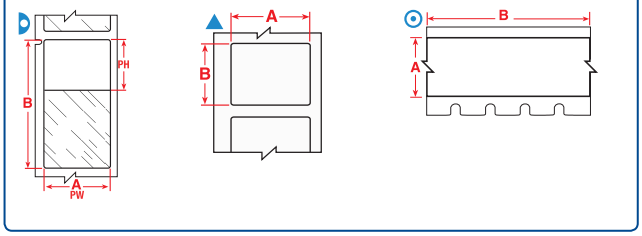
Part number explanation

Most Brady references for printable labels follow the same three-part format: The first code indicates the technology, the second part is a number indicating the label size (where applicable) and the third part indicates the Brady material (where applicable).

M71-73-461

- M71: BMP71 Technology
- 73: Label size code
- 461: Material (B-number)

Diagram



Labels are shown per vial / tube size and in order of label width.

The background colours in the Order Reference column represent the material colour

B-492 (FreezerBondz™)

"The special FreezerBondz™ labels are very reliable: they stick to the glass vials we use for our frozen fish tissue samples and, just as important, they remain readable to maintain accurate sample identification in long-term storage."

Centre for Ecology & Hydrology, UK

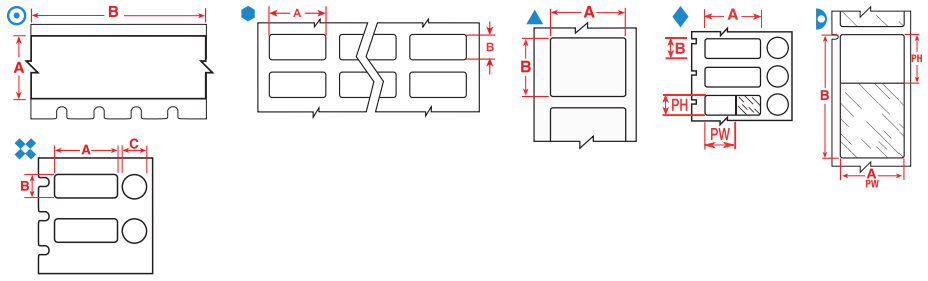
Conical / Large Tube Labels

Brady offers several sample identification labels which are perfect to identify conicals. They are easy to handle, have great flexibility and easily wrap around curved sample containers. Your sample identification label will remain attached and legible, even when the sample is stored in a freezer, in liquid nitrogen or heated in an autoclave.

- **F** Freezer environment
- **N** Liquid nitrogen environment
- **A** Autoclave environment
- **H** Hot water bath (100°C)
- **S** Self-laminating label
- **L** Low-profile (extremely thin) label
- **R** Removable

Diagram



Labels are shown per vial / tube size and in order of label width.

The background colours in the Order Reference column represent the material colour

BRADY WHEN PERFORMANCE MATTERS MOST™

Slide Labels

Brady offers labels specifically designed to identify slides and to resist exposure to harsh chemicals during the slide staining process. They perform well in the hematoxilin and eosin slide staining process and offer superior chemical resistance also useful in other laboratory contexts. StainerBondz™ (B-481) can resist temperatures ranging from -80°C (freezer) up to 121°C (autoclave).

Tissue Cassette Labels

Specifically designed to identify tissue cassettes, Brady's B-482 label withstands a temperature range from -80°C to 121°C and offers superior resistance to chemicals used in tissue processing enabling it to retain barcode legibility. The label must be used in combination with Brady's BSP™31 Label Attachment System for pre-process tissue cassette identification and complements the use of StainerBondz slide labels as part of a complete histology process.

Specimen Labelling Solution for Histology and Anatomic Pathology

As part of Brady's complete laboratory labelling solution, our combination of the B-482 Tissue Cassette label and the BSP™31 Label Attachment System, **ensures your specimen will stick throughout processing, embedding and sectioning**. See page 47 for more information on the BSP31.

B-498 Re-Identify Tissue Cassettes Labels

Tissue cassettes are often re-identified when labs collect samples from various biorepositories. Typically, each laboratory has its own unique way of identifying samples, which creates a need to re-identify samples in a common way.

Brady B-498 post-process labels offer customers the optimal way to organise these specimens and conduct further studies. These labels can be applied directly onto the cassettes, on pure paraffin wax and on top of another label or identifier.

This is not the same as Brady's B-482 tissue cassette solution. **B-498 Re-identify labels are applied after processing and are never used with the BSP31 label attachment system.**

Straw and Rod Labels

Brady offers a range of labels designed to fit the small surface area of straws and rods and will withstand long-term storage.

Labels are shown per straw size and in order of label width.

The background colours in the Order Reference column represent the material colour

See page 38 for Brady's range of label printers.

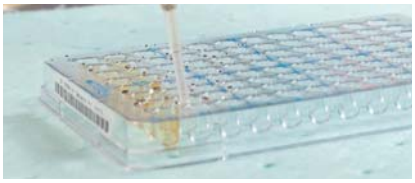
Part number explanation

Most Brady references for printable labels follow the same three-part format: The first code indicates the technology, the second part is a number indicating the label size (where applicable) and the third part indicates the Brady material (where applicable).

M71-73-461

M71: BMP71 Technology
73: Label size code
461: Material (B-number)



Well Plate Labels

When total tracking of all sample collections is required then Brady has a solution for Well plate identification. Our well plate labels guarantee crystal clear text and barcoding for most lab environments.

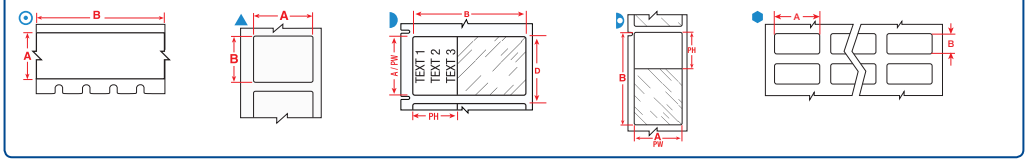
Bottles / Flasks & Dishes

Brady's labels for bottles, flasks and dishes are easy to handle and flexible. This enables the labels to be placed on curved containers and remain attached and legible, even after being subjected to freezing, liquid nitrogen and heat.

Diagram



Labels are shown in order of label width.

The background colours in the Order Reference column represent the material colour

See page 38 for Brady's range of label printers.

Bottle Tamper Seal Labels

Brady's bottle seal identification provides tracking information with the added feature of security. These labelling materials are designed to fracture easily in order to show signs of sample tampering and to prevent one-piece label removal.

Labels are shown in order of label width.

The background colours in the Order Reference column represent the material colour

See page 38 for Brady's range of label printers.

To find out how Brady helps some of the world's leading research laboratories develop more efficient labelling protocols visit **www.bradyeurope.com/lab**

Part number explanation

Most Brady references for printable labels follow the same three-part format: The first code indicates the technology, the second part is a number indicating the label size (where applicable) and the third part indicates the Brady material (where applicable).

M71-73-461

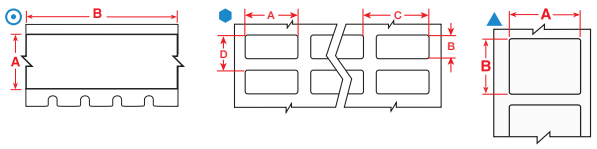
M71 — BMP71 Technology
73 — Label size code
461 — Material (B-number)

General Lab ID

Just like a durable sample label lets you know which sample you are holding, a cabinet or drawer label can inform you of the cabinet's content. With proper identification, time spent looking for the right sample or tool can be invested in what really matters. Brady offers a range of materials suitable for identifying drawers, cabinets, shelves, storage units and laboratory equipment.

- **F** Freezer environment
- **N** Liquid nitrogen environment
- **A** Autoclave environment
- **H** Hot water bath (100°C)
- **S** Self-laminating label
- **L** Low-profile (extremely thin) label
- **R** Removable

Diagram



Labels are shown in order of label width.

The background colours in the Order Reference column represent the material colour

See page 38 for Brady's range of label printers.

Label Printers, Label Attachment System and Barcode Scanners

Brady printers enable professionals to print highly specialised identification labels on-site and on demand. Partnered with labelling software for laboratories, Brady printers support considerable time savings and flexibility in sample identification.

For enhanced security Brady offers a label attachment system that rivets an adhesive label to tissue cassettes before the tissue embedding process.

To complete your sample ID automation, Brady has a range of barcode scanners which combine the industry's best imaging technology with a graphic display and rugged keyboard for fast, user-friendly data and inventory management.

	The BMP™21-LAB Portable Label Printer is an all-in-one labeller for research, academic and clinical labs. The BMP21-LAB printer can quickly and easily create legible labels for flat, curved or highly textured surfaces that stay stuck for years even when exposed to extreme temperatures and chemicals.	A powerful portable printer for on the job labelling in laboratories. With its extensive connectivity and networking options this easy to use system prints a large variety of high quality continous and die-cut materials up to 38 mm wide.	A powerful portable printer for labelling in laboratories with PC connection only. With its extensive connectivity and networking options this easy to use system prints a large variety of high quality continuous and die-cut materials up to 38 mm wide.	The most versatile portable printer for on the job labelling in laboratories. With its optimal efficiency it helps to reduce material waste and saves label making time. It prints on the largest variety of high quality continous and die-cut materials up to 50 mm wide and offers an option to have custom materials created.

BMP™21-LAB cartridges can be used in the first generation BMP™21 and LABPAL™ Label Printer.

BMP™21-LAB Label Printer

Tough on the outside, Genius on the inside

Combining a tough exterior with smart printing capabilities, the BMP21-LAB hand-held label printer can take a hit and still perform. **Laboratory symbols** & vial/tube auto-sizing, plus drop-lock-and-go cartridges, plus a rechargeable Lithium-ion battery adds up to a powerful and affordable tool for quick and efficient label making in any type of laboratory. **High quality label materials** designed specifically for the laboratory environment create durable, professional looking labels for your laboratory samples and beyond.

Designed for Laboratory

- Materials available for applications such as cryo vials and slides
- Greek symbols commonly used in laboratory, intuitive menu structure for symbols
- Vial label function automatically cuts the tape according to the size of the vial
- Automated serialisation
- Time & Date stamp

Easy to use

- 3 line LCD display provides clear visibility
- ABC keypad, graphics library, hot keys and menu functions for fast label creation
- Long life rechargeable Lithium-ion battery*
- Smart Cell Technology for automatic label setup
- Automatic label formatting for commonly used label types in laboratory
- Magnet accessory* for more convenient use and storage on smaller laboratory benches and a lanyard for hands-free operation
- Ergonomic, centre balanced printer with grab and go ridges grip for easy handling

Exceptional material variety and durability

- Laboratory specific materials designed to withstand harsh laboratory environments.
- High quality, long lasting labels that stick and stay stuck
- Prints durable true-sized 6 – 19 mm wide identification to maximise amount of data
- Adjust the length of the labels using the high performance continuous material
- Fulfill your requirements with a range of different industry specified materials that last

BMP™51/BMP™53 Label Makers

The BMP51/BMP53 Label Makers are compact, versatile portable printers with built-in Bluetooth® technology for wireless printing.

- Identify your samples quickly and more efficiently
- Portable/Handheld
- Labels withstand extreme laboratory temperatures and solvents
- Durable built-in cutter that retains the label after it's cut until you need it
- Built-in Bluetooth® or optional Wi-Fi card for wireless printing from a network
- A magnet accessory to keep your printer handy
- Serialisation feature for quicker aliquots

BMP™71 Portable Label Printer

The BMP71 mobile label printer can print on more than 30 different types of label material including several which are specifically suitable for a laboratory environment - all designed with Brady's industrial strength durability.

- The powerful BMP71 prints faster than any other printer in it's class (38 mm/sec). Don't wait longer than necessary for your labels.
- The BMP71 has a full keyboard, available in 4 versions, QWERTY, AZERTY, QWERTZ and CYRILLIC. Use both your hands to type your text intead on one finger and save you time!
- The enlarged colour screen of the BMP71 enables you to see the whole label at once, helping you to compose the label in the most efficient way, eliminating trial and error.
- The BMP71 printer is your essential tool that handles all your label printing needs

One smart printer to print it all.

BBP™11 Label Printer

The BBP11 is a compact desktop printer which provides high quality thermal transfer printing at a low cost.

- The Brady BBP11 is an entry level thermal transfer printer for vial and tube labels, Slide labels, bottles and many more.
- Identifying your laboratory equipment has never been so easy. Traceability of company assets is an absolute must these days and the BBP11 provides this solution.
- The BBP11 offers the best mix of high quality printing at a low cost price. The printer does not only yield high performance with durable and reliable output, it also provides important savings in desk space.
- This series is the ideal solution for low-to-medium volume printing, while offering a printout speed of up to 127 mm per second (200 dpi version).
- The standard internal ethernet port allows you to integrate your printer quickly into any application.
- USB Serial and parallel interfaces standard

B-492 and BBP11

"The BBP11 prints very quickly, providing a highly efficient way of producing labels for all the multiple tubes we need to freeze for each animal sample. The print quality looks very clear and neat, and we can get more information on our labels than before.

Brady's FreezerBondz™ labels not only withstand the long-term storage in liquid nitrogen required for samples going into the Frozen Ark, but they can also be applied to frozen surfaces (with a small overlap). This very useful property has enabled us to add labels to some tubes which had been stored with inadequate identification."

Institute of Zoology, Zoological Society of London, UK

BBP™33 Label Printer

The BBP33 Label Printer is a completely hassle free, easy to use PC-based printer that can print signs and labels up to 101.60 mm wide. Smart chip supplies automatically set up the label in your Brady software, eliminating manual calibration and label waste. Drop-in ribbon and label cartridges ensure fast and effortless material changes. The BBP33 Label Printer can print on a full range of laboratory labels and provides you clear and durable labelling to eliminate errors in sample identification and ensure traceability.

- Eliminate errors in sample identification and ensure traceability with clear and durable labelling
- Fits best in your laboratory environment due to its small footprint
- Label materials withstand extreme conditions, including freezer storage, liquid nitrogen and hot water baths
- Automatic label setup with no calibration
- Fast and effortless material changeovers
- Prints correctly on the first label!

Brady IP™ Series Printer

Load. Click. Print.
High Performance Printing
Made Faster And Simpler.

The Brady IP Printer redefines power and ease-of-use in thermal transfer printing. Our most popular benchtop solution, the IP utilises smart chip technology allowing the printer, ribbon, material roll and PC software to communicate which significantly reduces set up time, reduces change-out time and reduces calibration label waste. Get ready for fast hassle-free printing.

FASTER CHANGE-OUTS AND LESS WASTE

- Load Brady material and the software automatically recognises it
- No more calibration or material waste required for notched, die-cut or continuous materials
- Super-easy ribbon and material loading with centre-justified guides and straight feed path
- Hassle-free drop-in material rolls install in a snap

MORE PERFORMANCE

- Designed for up to 5000 labels per day at 8 hrs / 5 days per week operation
- Fast print speed – up to 200 mm/sec
- Prints on a vast selection of material varieties and materials, including custom-made parts
- LCD display shows correct material/ribbon match, visual sensor position and “material and ribbon remaining”

HASSLE-FREE OPERATION

- Fast hassle-free change-outs makes IP ideal for high-mix users (those using multiple material parts & put-ups)
- Perfect for users who are new to thermal transfer printing

BSP™31 Label Attachment System

- Brady has developed a unique set of products for the histology and anatomic pathology market in order to guarantee pre-process identification for tissue samples allowing traceability throughout laboratory processes as well as long term storage (< 20 years).
- The BSP™31 Label Attachment System is designed to mechanically fasten an adhesive label to a tissue cassette before the tissue embedding process. This easy-to-use unit creates rivets on the label which prevent the label from detaching during the embedding process or during long-term storage
- When a cassette is inserted into the front of the unit, a clamp automatically grabs the cassette. In less that a minute, four small heat probes pierce through the label and front plastic of the cassette. Heat applied to the probes melts the cassette plastic and forms rivets on the label. When the unit retracts the probes from the cassette, the cassette is released and the user can remove it and place the biospecimen onto the cassette.
- The BSP™31 unit must be used exclusively with Brady B-482 label material and the R6400 thermal transfer printer ribbon.

B-482 Tissue cassette labels

"We have received very positive feedback on the Brady cassette labels from researchers. They report that, as well as looking much more professional, the printed labels save time when they need to search through their archived blocks for a particular sample. Black text printed on a white label is very much quicker and easier to read than pencil on a green cassette. The clear labels therefore eliminate any confusion or mistakes which could occur with handwritten data."

Cardiff University – School of Biosciences, UK

B-498 Re-Identify Tissue Cassettes Labels

Tissue cassettes are often re-identified when labs collect samples from various biorepositories. Typically, each laboratory has its own unique way of identifying samples, which creates a need to re-identify samples in a common way.

Brady B-498 post-process labels offer customers the optimal way to organise these specimens and conduct further studies. These labels can be applied directly onto the cassettes, on pure paraffin wax and on top of another label or identifier.

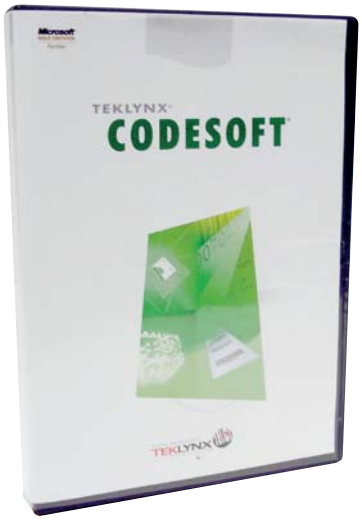
This is not the same as Brady's B-482 tissue cassette solution. **B-498 Re-identify labels are applied after processing and are never used with the BSP31 label attachment system.**

LabelMark™ Laboratory Labelling Software

LabelMark software features a lab-friendly interface and hundreds of parts and graphics categorised by common laboratory applications making creating legible, durable and accurate labels quick and easy.

- Easy-to-use Lab Application to create new files and templates
- Superscript and subscript characters
- Database import capabilities with refresh feature to ensure data integrity
- 2D bar coding and linear bar coding
- Multi-label data entry view
- Compatibility with a variety of Brady printers including BMP51/53, BMP71, BBP11, BBP33, IP, and BP-PR Plus as well as all Windows®-based printers
- 2-way communication with Brady printers, enabling automatic label recognition, selection and setup

CodeSoft™ Label Creation Software



CodeSoft is a very powerful, feature-rich design software. It has the most text editing and bar code features, plus it is the best choice for advanced database importation and integration with 3rd party software programs - like LIMS.

- Over 100 Bar code symbologies including linear and 2D
- Robust data sourcing capabilities
- View labels and data in the same screen
- Label Comparison tool for previewing labels at design or production stages
- OLE automation supports object integration from any 3rd party Windows® application
- Enhanced Shape Tool makes using graphics and shapes on your labels a snap
- CodeSoft Pro - is for users printing text, images and bar codes on one to three printers
- CodeSoft Enterprise - is for user printing from databases and existing systems
- CodeSoft Network - is for users who want to manage licenses from a server

Code Reader® Scanners

Scanners improve sample tracking, eliminate human error and save an enormous amount of time during both labelling and retrieving samples.
Code Reader Scanners combines the industry's best imaging technology with a graphic display and rugged keyboard that makes this new standard in small, fast user-friendly data and inventory management. Now the best portable all-symbology bar code reader in the industry is even more versatile, with the addition of information display and keyboard entry functions.

There are 2 interface options:

Cabled (Basic)
Plug-an-play interface. Available with USB (standard), PS2 or RS232 interfaces. All cables use rugged automatic locking adapters that allow users to change cables while preventing inadvertent disconnections.

Batch (Basic + Battery)
Cables and Store and Forward capacity in one unit. Simply detach the scanner from the computer, capture data remotely and reconnect to the computer. When reconnected, the scanner will automatically download data to the active application. When connected via the included USB cable, the unit operates as a standard keyboard wedge.

Benefits of Bar Coding and Scanning

- Quickly identify and retrieve samples
- Eliminate human error with log-in and inventory data entry
- Accurately track samples and chemicals from receipt to disposal
- Automatically update sample information

Take advantage of the following features:

- Dual field optics, both high density and wide field in the same unit
- Glare reduction technology for reading codes on shiny surfaces
- Reads all linear, stacked and 2D matrix symbologies
- Dynamic Optimisation Technology

Linear vs. 2-Dimensional Bar Codes

7 mil Examples	10 mil Examples	Symbol Size (mm) Row x Column	Bar Code Data Capacity		Built-in Error Correction

25.40 mm / Linear / Code 128 Bar Code	31.75 mm / Linear / Code 128 Bar Code	31.75	10	10	NO

Code Reader™ 1400

The CR1400 is a compact, rugged barcode reader that features a high performance scan engine and intuitive targeting that makes reading 1D and 2D barcodes extremely fast, reliable and affordable.

- High speed, omnidirectional reading of 1D and 2D barcodes
- Patented dual field optics, both high density and wide field in the same unit
- Glare reduction technology for reading codes on shiny surfaces
- Manual or automatic triggering
- 3 programmable indicators: vibration mode, LED and tone
- Data editing and parsing with JavaScript
- Disinfectant ready, IP54 housing

361109	CR1400 Scanner with 1.83 m USB cab
361103	Metal stand and Base for CR1400 Scan

Code Reader™ is a registered trademark of Code Corporation.

Code Reader™ 2600

The CR2600 is an easy to use, lightweight, and high performing barcode reader that reads all 1D and 2D barcode symbologies. Featuring a durable, rechargeable battery plus programmable buttons for a custom workflow, it sets the standard in barcode reading technology.

- Battery status LED indicators with fuel gauge
- Programmable user feedback with vibration, audible tones and LED
- Patented dual field optics, both high density and wide field in the same unit
- High speed, omnidirectional reading of 1D and 2D barcodes
- Unequalled performance on rounded, curved and shiny surfaces
- Multiple programmable buttons for customised work flow processes
- Easy to clean, disinfectant ready, IP65 housing for healthcare use
- Powerful data management capability with JavaScript

Code Reader™ 3600

The CR3600 sleek, wireless scanner has a colour screen and keypad that allows users to manually enter data in real time. The screen provides a mobile solution for users who need instant visibility to scanned information, the device handles every type of mobile barcode need.

- Bright colour display screen
- Lightweight models in palm and handled configurations
- Durable, quick-release rechargeable battery cartridges
- Battery status LED indicators with fuel gauge
- User feedback with vibration, audible tones and LED
- High speed, omnidirectional reading of 1D, 2D barcodes
- Multiple programmable buttons for customised work flow processes
- IP54 housing securely protects electronics and optics
- Powerful data management capability with JavaScript
- Compatible with Bluetooth supported Android, iOS, and Windows mobile devices and tablets

All Chemicals Labelled?

CLP is a mandatory European Union regulation which requires, amongst other obligations, the clear identification of products containing dangerous chemicals.

The EU's CLP regulation is based on the United Nation's Globally Harmonised System for chemical substances and, from June 2015 onwards, compliance to CLP is required for dangerous chemicals and mixtures in all EU member states. Every substance listed as dangerous, and every mix containing one of these dangerous substances, also needs to carry a CLP label as of June 2015.

What is CLP

Classification, Labelling and Packaging (CLP) of substances and mixtures is the EU Regulation 1272/2008 which is an EU-wide system for classifying and labelling chemicals.
The system adopts the United Nations' Globally Harmonised System, or GHS.

- The GHS/CLP symbols were introduced in the EU on the basis of the CLP/GHS regulation (Classification, Labelling and Packaging) in January 2009.
- **GHS/CLP replaces the HSID labelling:** The orange coloured hazardous materials pictograms used until now are being replaced with new diamond-shaped pictograms on a white background with a red border. The current R+S Statements will be replaced by H+P Statements (+ EUH Statements). In the EU, it has been required since 01.12.2010 to label **chemical substances** in accordance with the regulation. As from 01.06.2015 this requirement also applies to **chemical mixtures**. In the CLP/GHS the signal words "Danger" and "Warning" must be used, in accordance with the substance.

Why does GHS matter?

Chemical import/export means big business

Globally, the production and use of chemicals is a more than 1.5 trillion € per year enterprise (340€ billion in the U.S. alone). Chemical labelling has appeared differently based on different regional requirements. With such an impact on the world economy, it's critical that the import and export of chemicals be made as safe and efficient as possible.

The GHS standard globally helps keep workers safe and informed of chemical hazards.

Pre-Printed Labels with CLP/GHS Symbols

Brady has a wide range of pre-printed labels to identify your chemical containers.

- High quality labels that can withstand the toughest environments
- Ultra-durable materials mean you only need to label products once in their lifetime
- Extremely weather, abrasion and chemical resistant
- Labels can withstand temperatures of -40 °C to +120 °C

Pre-printed GHS/CLP Chemical Labels

Print 2 colour GHS labels in one fast print pass!

- Blank labels with pre-printed red diamonds allow printer to produce 2 colour GHS/CLP labels in one print pass
- 3 sizes of labels, each with 6 different diamond layouts that match templates in MarkWare™ Software 3.9.1 or higher. Visit www.bradyeurope.com or contact your Brady distributor for more information.
- Indoor/outdoor vinyl material withstands exposure to moisture, chemicals and handling

Spill Safety Stations

- Easy to locate and identify from all angles
- Find essential spill safety items in one place
- Instantly notice when stock is running low
- Easy to install
- **Gloves, disposal bags, tear-off absorbent pads:** essential items to clean up spills safely and quickly dispose of them
- **Best practice guide:** 10 best practice steps on how to deal with a spill safely

Order Reference	Article No.	Description	Quantity
SS-EMP	134431	SPC Spill Station Empty	1

There are two types of Spill Safety Station to help you respond to different kinds of spill. Each station can be supplied with or without Economy Spill Kit.

Spill Stations

Order Reference	Article No.	Description	Quantity
SS-MRO	134434	SPC Spill Station Chem, English version	1 Kit
SS-UN	134437	SPC Spill Station Universal, English version	1 Kit

Spill Stations With Economy Spill Kit

Order Reference	Article No.	Description	Quantity
SS-MRO-GRAB	134435	SPC Spill Station Chem & Grab, English version	1 Kit
SS-UN-GRAB	134436	SPC Spill Station Universal & Grab, English version	1 Kit

Yellow disposal bags can be ordered separately.
Article number: 834179 - Order Reference: BAG-DIS-YEL

Spill Response Plus

Spill Response Plus is a smaller size pad and roll designed to be highly absorbent, durable, low lint and to reduce waste.

- Dimpled design provides better looking, strong and durable product
- Roll is perforated so you only use what you need
- Includes universal (grey) and chemical (green) applications
- **Perfect to be used with Spill Safety Stations**

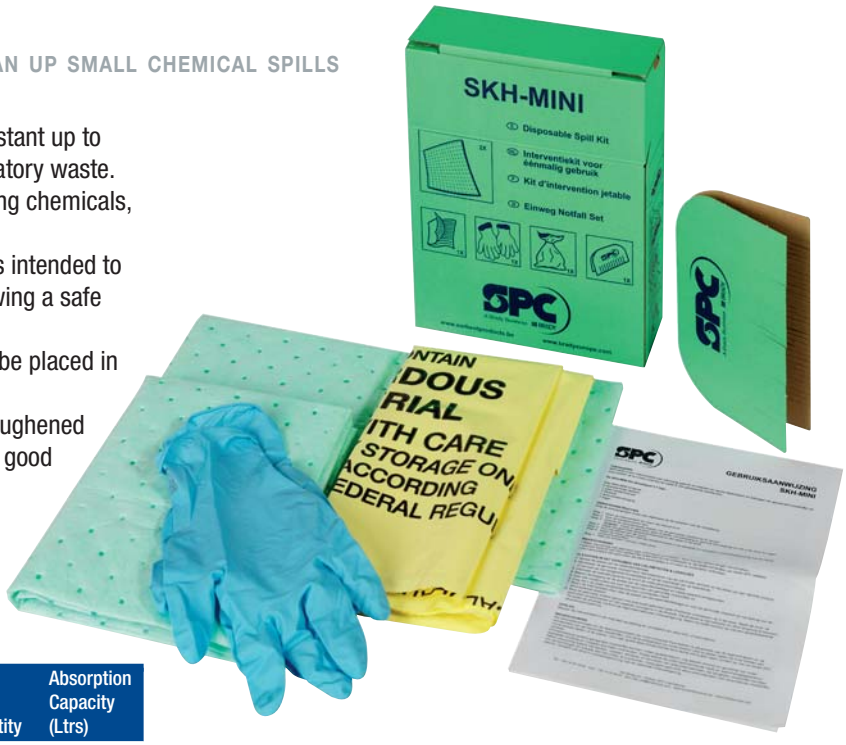
Order Reference	Article No.	Description	Colour	Total Qty/ Pack	Absorption Capacity (Ltrs)
MRO365-P	834176	ROLL, universal, 19 cm x 15 m, Heavy weight, perforated & bonded (60 pads per roll)	Grey	1 Roll(s) / Bag	15
UN365-P	834177	ROLL, chemical absorbency, 19 cm x 15 m Perforated, 60 pads per roll	Green	1 Roll(s) / Bag	12

SKH-Mini

A FULLY DISPOSABLE SPILL KIT TO CLEAN UP SMALL CHEMICAL SPILLS EASILY AND WITHOUT RISK OF INJURIES.

- The autoclavable disposal bag is heat resistant up to 145°C to guarantee safe disposal of laboratory waste.
- Suited for spills of up to 1.7 litres, absorbing chemicals, water & oil based fluids.
- The specially designed disposable brush is intended to sweep up any broken glass or debris allowing a safe clean up without risk of injuries.
- Compact design: the SKH-MINI can easily be placed in any areas where it is most needed.
- Protective gloves are powder free, have roughened fingertips, increased tear resistance and a good chemical resistance for more safety.

Contents: 2 pads (41 cm x 51 cm), 1 pair of disposable chemical protective gloves, 1 autoclavable disposal bag, 1 disposable brush and 1 multilingual instruction guide.



Order Reference	Article No.	Description	Quantity	Absorption Capacity (Ltrs)
SKH-MINI	813868	Disposable spill kit, chemical	4 Kits/Box	6.80*

Hazwik Pillows

For absorbing spills & leaking liquids in tight spaces.

- Absorb chemicals, acids & bases.
- Good for large spills once contained.
- Ideal for use in packaging for extra protection during transport.
- 2 different sizes to fit any application.

Order Reference	Article No.	Description	Total Qty/Pack	Absorption Capacity (Ltrs)
HAZ1818	813853	Pillow, 43 cm x 48 cm	16 Piece(s) / Box	105
HAZ1818-2	813854	Pillow, 43 cm x 48 cm	8 Piece(s) / Box	53
HAZ99	813855	Pillow, 23 cm x 23 cm	32 Piece(s) / Box	58

Protection of fragile liquids during transport.

UN Booms

THE BEST WAY TO ABSORB AND CONTAIN LARGE SPILLS OF CHEMICALS AND HAZARDOUS LIQUIDS.

- Absorb chemicals, acids & bases as well as oils and water-based liquids.
- Metal clips & rings allow for easy linking of booms.
- Inner rope secured with four clips provides strength.
- Strong outer sleeve for durability.
- Inner sleeve keeps the adsorbent material intact within the boom.

Order Reference	Article No.	Description	Total Qty/Pack	Absorption Capacity (Ltrs)
UN810	813848	Boom, Ø 20 cm x 3 m	4 Piece(s) / Bag	263
UN510	813849	Boom, Ø 13 cm x 3 m	4 Piece(s) / Bag	118

Hazwik Socs

CONFINE & PREVENT HAZARDOUS SPILLS FROM SPREADING.

- Absorb chemicals, acids & bases.
- Different lengths available to always have the right size for your application.
- Flexible design is easily moulded around machines and spills.

Order Reference	Article No.	Description	Total Qty/Pack	Absorption Capacity (Ltrs)
HAZ412	813850	Soc, Ø 7.6 cm x 122 cm	12 Piece(s) / Box	45
HAZ806	813851	Soc, Ø 7.6 cm x 244 cm	6 Piece(s) / Box	48
HAZ124	813852	Soc, Ø 7.6 cm x 366 cm	4 Piece(s) / Box	45

UN Pads & Rolls

For use when chemicals and hazardous liquids are involved!

- Chemically inert: product does not degrade or cause a dangerous chemical reaction with the adsorbed liquid.
- One-sided spunbond gives extra strength as well as lower lint.
- Perforated for flexibility – tear at the perforations for smaller sized pads to use only what you need.

Pads

Order Reference	Article No.	Description	Total Qty/Pack	Absorption Capacity (Ltrs)
UN100-E	813842	PADS, 41 cm x 51 cm, Medium weight, perforated & bonded	100 Pad(s) / Box	88
UN1212-E	813843	PAD, Medium weight, bonded 30 cm x 30 cm, 50 pads/Bag, 4 Bags/disp.box	200 Pad(s) / Dispenser Box	76

Rolls

Order Reference	Article No.	Description	Total Qty/ Pack	Absorption Capacity (Ltrs)
UN15-2DP-E	813844	ROLL, Medium weight, double perforated & bonded 38 cm x 46 m	2 Roll(s) / Box	147
UN15-DP-E	813845	ROLL, Medium weight, double perforated & bonded 38 cm x 46 m	1 Roll(s) / Dispenser box	73
UN15-DPS-E	813846	ROLL, Medium weight, double perforated & bonded 38 cm x 22 m	1 Roll(s) / Dispenser box	35
UN30-DP-E	813847	ROLL, Medium weight, double perforated & bonded 76 cm x 46 m	1 Roll(s) / Box	147
UN365-P	834177	ROLL, chemical absorbency, 19 cm x 15 m Perforated, 60 pads per roll	1 Roll(s) / Bag	12
